About Website Maintenance Report

This report comprehensively documents all the tasks undertaken to update the website, focusing on the upgrade of plugins and WordPress versions. It details the steps taken to ensure the seamless integration of new features, enhance website performance, and maintain compatibility with the latest WordPress updates.

Furthermore, the report addresses the resolution of security and vulnerability issues, outlining the specific measures implemented to safeguard the website against potential threats. By meticulously updating the plugins and WordPress versions, and by proactively addressing security concerns, we have reinforced the website's stability, functionality, and security posture.
